FEMIOLIN

Feminine cleansing and care

A five-format cosmetic collection for feminine personal care. Explore rinse-off cleansing formats and complementary care products with UNICOMPASS for your target market and channel.

Begin with Balance Care Wash Gel or Bubble Foam when assessing a rinse-off cleansing range. Select additional formats after reviewing each product's label, application area and customer needs.

Product range

Product	Format and supplier-described features
Balance Care Wash Gel	Rinse-off gel cleanser. Described as mildly acidic, with a soft foaming texture. The brochure directs application to the external vulval area followed by rinsing.
Balance Care Bubble Foam	Ready-to-dispense foam cleanser. Supplier materials highlight coconut-derived surfactants and a soft foam texture.
Balance Care Mist	Mist in an airless container. Presented for cosmetic moisture care. Confirm spray directions and application area for the selected SKU.
Balance Care Ampoule	No-rinse ampoule format. Supplier materials describe a mildly acidic formula with plant-derived ingredients. Confirm application area and full label directions.
Probiotics Feminine Wipes	Individually packaged cleansing wipes. “Probiotics” is part of the supplied product name; it does not establish that live organisms are present.

Review the details. Build the right offer.

Formulation information

Supplier materials highlight heat-treated Lactobacillus-derived ingredients (described as parabiotics), hyaluronic acid and botanical extracts. Request the current full INCI list, fragrance information and product pH for each selected item; formulation details are confirmed per SKU.

Use and product scope

For the wash gel, the supplied brochure describes cleansing the external vulval area and rinsing with water. This collection is presented for cosmetic cleansing and moisture care. Application areas and directions vary by format; select and use each product according to its current label.

Buyer and channel fit

Assess the range with importers and distributors serving adult feminine personal-care customers through established beauty, pharmacy or specialist retail channels. Premium positioning should be evaluated against product experience, packaging, the final retail price and repeat purchase potential.

Before placing an order

Product: confirm net content, pack configuration, full ingredients, fragrance, application area, directions, precautions and shelf life.
Evidence: request current product-specific safety and quality documents, microbiological data and support for any proposed cosmetic claim.
Commercial: confirm samples, MOQ, wholesale terms, lead time, territory and channel availability.
Market: review local classification, labeling and import requirements before sale.

Discuss your market with UNICOMPASS

Share your destination country, sales channel, selected products and estimated order volume.
